Technical Interview

- Create an introduction page, once you click start survey, the survey start.
- Keep 10 questions and each question should have **1** to **5** ratings.
- Once the user selects the rating, go to the next question and update the bar progress.
- Calculate all the questions rating values and convert them into %.

- Based on the below logic define the user levels dynamically.

  Logic Condition:

  If scores,
  - 0 to 30% ▢ Basic Level
  - 31 to 70% ▢ Intermediate Level
  - 71 to 100% ▢ Advance Level

  Use the following slides as a reference to carry out the test

Welcome to the *Your Voice* Employee Survey. This survey is an opportunity to voice your views about working at Oracle, how the business is operating, and how it can be more productive. Your insights are important to the management team, and key findings from the survey will be used to help the organization continue to improve its effectiveness.

Every item in the survey provides an opportunity for you to add comments. Just hover below your selected rating to show the '+ Comment' button and click it to add a comment. **Once finished, please be sure to click the 'Save' button, otherwise your response will not be submitted to Glint.** Your comments will be reported exactly as you write them if at least 15 people respond to a question. Take care not to identify yourself or others in your comments with the words or language you use.

Note: If you have witnessed or suspected a violation of Oracle's code of Ethics and Business Conduct, please report it through Oracle's Compliance and Ethics helpline via phone or by using the online website. Your HR representative is another contact point. Due to the confidential nature of the survey, Oracle will not be able to act on such issues raised in your comments here.
